Art Unit: 2635

1. This Office action is in response to the application filed February 26, 2004. Claims 1-10 are pending.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 3-5, it is not clear how an adaptor can be a monitor, an earphone, or a speaker.

Regarding claims 6-7, it is not clear how a USB port can be itself or an IEEE1394 port.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by SanDisk Cruzer Mp3 Companion.

Regarding claim 1, the claimed data storage device is shown as the USB flash drive. The claimed encoder/decoder device is shown as the Cruzer Companion which functions as an MP3 player. The flash drive connects to a USB port which is found on the Companion.

Regarding claim 9, flash memory is a memory card.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2635

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 8 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over SanDisk Cruiser.

Regarding claims 8 and 10, one of ordinary skill in the art would recognize that memory storage is not limited to semiconductor memory. CD rom and hard disks are alternative memories with much greater capacity and lower storage costs. It would have been obvious to use alternative storage for its inherent advantages. For example, the early generation iPods used hard disks as a memory storage means. Other MP3 players used CD ROMS as removable media for the storage of song files.
